

Product Change Bulletin

Subject: 115V 57RPM 300 Power Drive Plug Changes for IEC Certification

Cat Numbers Affected: 75075 Model 300 Power Drive 115V 57 RPM
15722 Model 300 Complete 115V 57 RPM

Date: August 10, 2020

Dear RIDGID Customer:

The Ridge Tool Company is committed to provide the highest quality products. We recently completed a project certifying our threading equipment to the latest International Electrotechnical Commission (IEC) standards. Most products passed with minimal or no modifications and did not affect the configuration, operation or performance of the machine. However, the 300 Power Drive and 300 Complete 115V 57 RPM machines required a change from a 15Amp NEMA 5-15 plug to a 20Amp NEMA 5-20 due the current draw at the high RPM. We understand this may cause some inconvenience, but the modification was necessary to comply with the latest standards. Ridge Tool Company does not recommend altering or adapting the 20 Amp plug for use on a 15 Amp service.

If you have any questions regarding this Product Change Bulletin, do not hesitate to contact Ridgid Technical Service at 1-800-519-3456 or email us at rtctechservices@emerson.com.

Sincerely,

Larry Feskanich
